

# Project Void field guide

What you are looking at on voidsresearch.com, in five minutes.

FREE · EDUCATION ONLY

Voids Research · voidsresearch.com · updated Nov 16, 2026

Education only. Not financial advice. No buy or sell calls. Past results do not predict future results.

1 · THE HOMEPAGE

# One big story. A few small ones. A ticker strip.

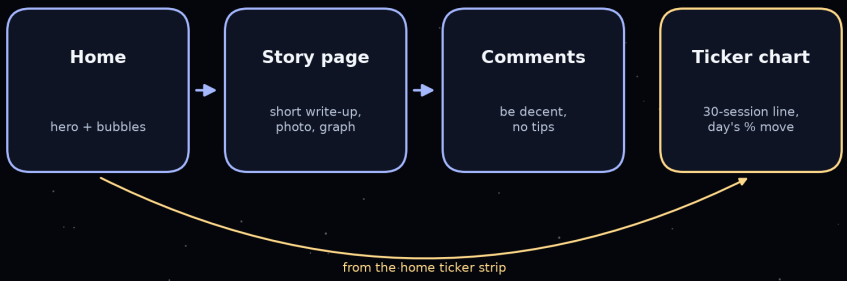
Sketch of the planned homepage. Symbols and numbers are made up.

- **Hero news bubble**: the one story that matters most today, with its source.
- **Bottom bubbles**: tap one to open a short story page.
- **Ticker strip**: tap a symbol to open its chart page.

Status Nov 16, 2026: this layout is being built. Some parts are not on the public site yet.

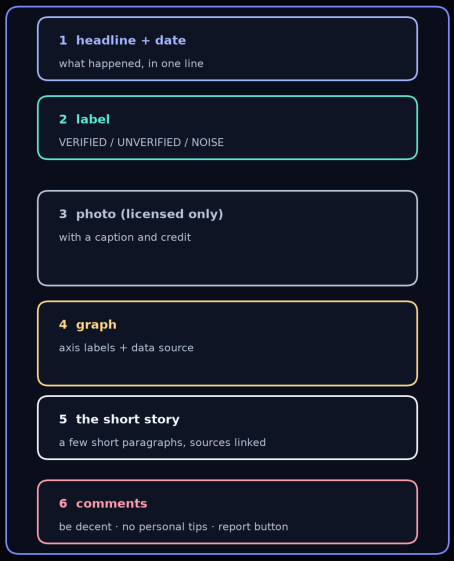
## 2 · WHERE A TAP GOES

# Home → story → comments. Ticker → chart.



Every path is read-only. No path leads to a trade.

## 3 · A STORY PAGE



Six parts, top to bottom. Photos are licensed or not used.

4 · LABELS ON FACTS

## Every fact wears a label.

**VERIFIED**

we opened the primary source and it says this

**UNVERIFIED**

reported or claimed, not confirmed yet

**NOISE / RUMOR**

loud, unsourced, treat as noise

If a claim has no label, treat it as unverified.

**A story is not a buy call.** It tells you what happened and where we read it. What you do with it is your call.

5 · COMMENTS

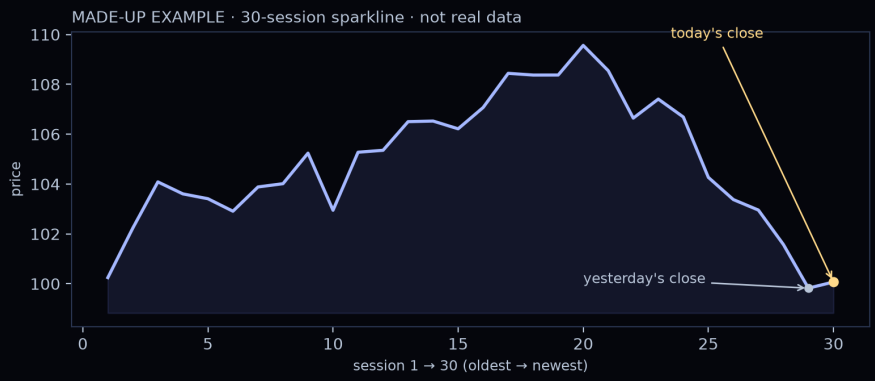
## Comments: be useful or be quiet.

- Adults only (18+). Text only.
- No personal tips ("buy X now"), no pumping, no spam, no attacks.
- A report button sits on every comment. We remove posts that break the rules.
- Comments are other readers' opinions, not ours and not advice.

Comment rules are a draft until legal review.

6 · A TICKER CHART PAGE

# Two numbers: a 30-session line and the day's move.



A sparkline is a sketch of the last 30 trading sessions. It is history, not a forecast.

**day's % move = ( today's price − yesterday's close ) ÷ yesterday's close × 100**

made-up example: ( 103.00 − 101.00 ) ÷ 101.00 × 100 = +1.98%

one day's move is one day. it is not a trend, a forecast, or a signal.

# Check the time stamp before the number.

**END OF DAY**

last official close

**DELAYED (e.g. 15 min)**

a few minutes behind the real market

**LIVE**

real time · costs more, needs exchange licenses

Every chart will say which of these it is.

**Data provider: not chosen yet.** Charts will name their licensed source once one is signed. Until then, ticker pages stay in preview.

## 7 · FREE VS MEMBERS

**FREE · open now**

- headlines with sources
- short story pages
- beginner lessons
- these free guides

**MEMBERS · not open yet**

- deeper research
- the five-part rotation class
- opens only after the system is tested + legal review

Members opens only after the system is tested and legal review is done. Nothing is for sale today.

# The fine print, in plain words

**Education only, not financial advice.** Nothing here tells you to buy or sell anything. No returns are promised. Every reader gets the same material. Past results, real or backtested, do not predict future results.

Trading is one tool. It is not your whole identity, and it is not a way out of a bad week. Lose small, stay curious, keep a life outside the screen.
